

What is Claimed is:

1. A method for creating a presentation, comprising the steps of:
receiving indicia representative of a goal and presenting the goal on a display;
integrating examples into the presentation to provide assistance with achieving the goal;
monitoring progress of a student toward the goal and providing feedback that further assists the student in accomplishing the goal; and
providing a dynamic toolbar on the display to assist the student with achieving the goal.
2. A method for creating a presentation as recited in claim 1, wherein the dynamic toolbar instantiated from information in a database.
3. A method for creating an accounting goal based presentation as recited in claim 1, wherein the credit processing material is integrated into the presentation.
4. A method for creating a presentation as recited in claim 1, wherein the dynamic toolbar contains utilities that are integrated in the presentation.
5. A method for creating a presentation as recited in claim 1, wherein the dynamic toolbar is instantiated by a message from the presentation to a database object containing information indicative of the current status of the presentation.
6. A method for creating a presentation as recited in claim 1, wherein the dynamic toolbar contains polymorphic logic that is dynamically instantiated based on characteristics of the presentation when the toolbar is instantiated.
7. A method for creating a presentation as recited in claim 1, wherein the dynamic toolbar includes linkages to the Internet.
8. A method for creating a presentation as recited in claim 1, wherein the dynamic toolbar includes an interface to perform electronic mail management.
9. A method for creating a presentation as recited in claim 1, wherein the dynamic toolbar includes an interface that facilitates telephony functions from the presentation.
10. An apparatus that creates a presentation comprising;
a processor;
a memory that stores information under the control of the processor;
logic that integrates examples into the presentation to provide assistance with achieving the goal;

logic that monitors progress of a student toward the goal and provides feedback that further provides the student assistance in accomplishing the goal; and

logic that presents a dynamic toolbar on the display to assist the student with achieving the goal.

11. An apparatus that creates a presentation as recited in claim 10, wherein the dynamic toolbar is instantiated from information in a database.

12. An apparatus that creates a presentation as recited in claim 10, wherein the dynamic toolbar is context-sensitive to the presentation.

13. An apparatus that creates a presentation as recited in claim 10, wherein the dynamic toolbar contains utilities that are integrated into the presentation.

14. An apparatus that creates a presentation as recited in claim 10, wherein the dynamic toolbar is instantiated by a message from the presentation to a database object containing information indicative of the current status of the presentation.

15. An apparatus that creates a presentation as recited in claim 10, wherein the dynamic toolbar contains polymorphic logic that is dynamically instantiated based on characteristics of the presentation when the toolbar is instantiated.

16. An apparatus that creates a presentation as recited in claim 10, wherein the dynamic toolbar includes linkages to the Internet.

17. An apparatus that creates a presentation as recited in claim 10, wherein the dynamic toolbar includes an interface to perform electronic mail management.

18. An apparatus that creates a presentation as recited in claim 10, wherein the dynamic toolbar includes an interface that facilitates telephony functions from the presentation.
